

Amani Sirelkhatim Awad

Frontend Developer & Flutter Engineer — working toward Full-Stack Development with Laravel

amanisirelkhatim1509@gmail.com | linkedin.com/in/amani-sirelkhatim-718857291 | github.com/amani-sirelkhatim | Sudan

PROFILE

Developer from Sudan working across frontend, Flutter, and PHP/MySQL development. Designed and built a Flutter and Supabase mobile app end-to-end, solo, as an individual Master's project, now being adopted by a live company for daily operations. Currently maintain and develop PHP/MySQL systems used inside The Future University for employee evaluation and exam scheduling. Comfortable working in both Arabic and English for technical and formal documentation, and currently completing a Full-Stack Development Diploma focused on Laravel.

EXPERIENCE

Technical Support Engineer <i>Center of Technical Services, The Future University</i>	Nov 2024 – Present
— Maintained, enhanced, and troubleshoot internal university systems supporting academic and administrative operations. — Developed new web-based systems and features based on requirements from university departments. — Built PHP/MySQL solutions for managing university data, records, evaluations, and scheduling processes. — Designed database structures, queries, and data-management functionality for new and existing systems. — Worked with university staff to gather requirements, test new functionality, and improve system usability.	
Middle Manager & Operations Coordinator <i>Nubia Royal Apartments</i>	04/2021 – 05/2023
— Managed the furnished-apartment management system and maintained its operational data related to properties, tenants, payments, and operations. — Coordinated operational workflows involving staff, maintenance, and property management. — Currently developing a responsive website for both Nubia Royal Apartments branches.	
Middle Manager & Accountant <i>Alyaraa Ltd.</i>	04/2021 – 05/2023
— Managed the company's accounting system and maintained accurate financial and transaction data. — Processed and recorded weekly and monthly transactions and employee payments. — Generated reports from system data to support management and business operations.
